

Combined actions from Municipalities in Greece EXOIKONOMO PROGRAMME

CRES

Objectives

The “**EXOIKONOMO**” Programme aims to improve energy efficiency at a local level, as well as to increase the awareness of citizens and local authorities regarding energy saving, by the implementation of municipal **SEAPs**.

The total programme budget is EUR 107 million.

70% of project costs will be financed from the Programme, while the remaining 30% will be covered by the Municipalities.

Methodology

→ The programme is a great opportunity for the Municipalities to introduce the integrated urban design, while the repeatability in the implementation of SEAPS is supported.

→ The SEAPs include energy saving measures with direct results, such as interventions at

- existing municipal buildings
- urban transport
- public areas
- infrastructures

as well as dissemination activities.

Financial resources

The Programme has been initiated and supervised by the **Ministry of Environment & Climate Change** and **CRES** acts as the Interim Management Agency.

The beneficiaries of the Programme are **64** municipalities all over Greece, funded with **35.000.000** euros and their energy saving interventions will be completed until **31/12/2015**.
