## Mayors in Action Publication Report on selected SEAP-actions

### D3.3. Fact sheets of the selected actions

CB08 Interleuven

Deliverable No.	D3.3. Fact sheets of the selected actions
Work Package	3 – Implementation of SEAP's
Dissemination Level	PU
Author(s)	Stefan Kempeneers, Interleuven
Co-author(s)	Sus Bergmans, Interleuven
Date	25 February 2017
File Name	D3.3_Fact sheets_CB08_2017-02-25

This report has been prepared in the framework of the European project MAYORS in ACTION - Empowering Covenant of Mayors Coordinators and Supporters to assist municipalities in implementing and monitoring their 'Sustainable Energy Action Plan' (Grant agreement no. IEE/13/S44/S12.676042) - co-financed by the European Commission in the "Intelligent Energy – Europe" (IEE) Programme.

## Fact sheets of the selected actions

### The Mayors in Action project selected 142 actions of 62 local governments

All partners of the Mayors in Action project, except ICLEI, had to support at least 5 local governments (LGs) in the selection and (the preparation of) the implementation of SEAP-actions during the project duration. A SEAP is a 'Sustainable Energy Action Plan' submitted by a local government in the frame of the Covenant of Mayors (CoM).

Trainee LGs commit to the implementation of actions planned in their SEAP that will lead to CO<sub>2</sub> reduction, energy savings and the use of renewable energy sources. The actions were not funded through the MAYORS in ACTION project budget. Only the costs of the partners (tutors) to support the LGs (trainees) were part of the project budget.

In total 62 trainee LGs out of 7 countries were involved in the project so far and together they selected no less than 154 SEAP-actions (by the start of the project, finally 142 actions were involved at the end of the project duration) to be implemented in the project life time.

The selection of actions are the result of a process with local stakeholders according to the following criteria:

- Technical appraisal criteria – reliability of technology, minimum technological risk, energy savings achieved, utilization of local potential - RE produced;
- Financial appraisal criteria, bankability (bankable project analysis) – initial investment, project profitability - simple payback
- Environmental appraisal criteria – emission reduction, improved air quality, better living environment;
- Social and political criteria – building comfort, local job creation, local acceptability
- Associated risks, etc.

Each action chosen by C&S and LGs is different and has its unique technical, administrative and financial challenges: therefore every single one action will have a separate project fiche (fact sheet) with all the details of the project.

Action implementation will be carefully planned and the following parameters will be clearly defined and reported on the fact sheet:

- timing,
- clear responsibilities,
- budget and financing sources,
- modality of monitoring of each action.

## Annexes:

### Annex 1: Inventory of fact sheets of all local actions.
