

Civitas ELAN

THE CITY OF ZAGREB

Objectives

CIVITAS ELAN, a member of the big European family CIVITAS project, aims at improving the quality of life for citizens by establishing high-quality solutions in urban transport through promotion and enhance of sustainable, clean and energy efficient ways of traffic flow. In order to provide successful implementation of the project, citizens need to be included by providing them with useful information which will contribute to raising awareness as well as sensitizing the public on traffic problems and active participation in decision making.

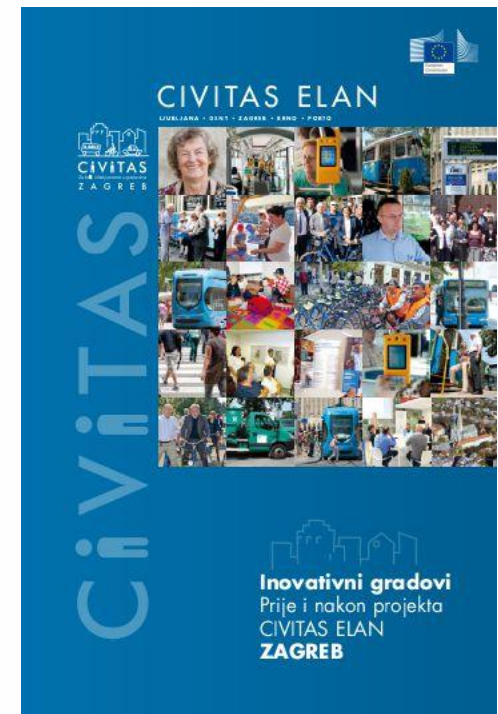

THE CIVITAS INITIATIVE
IS CO-FINANCED BY THE
EUROPEAN UNION

The project includes eight areas of activity:

- alternative fuels and energy-efficient vehicles
- common travel services and integrating different modes of transport
- managing mobility according to specific needs
- effect on traffic behaviour
- protection, safety and health
- innovative transport services
- load distribution
- traffic telematics

Benefits/Results

CIVITAS project conducted the procurement of new energy efficient vehicles with more favourable impact on the environment as well as an electronic system for ticket charging and improved conditions in order to create more energy efficient and environmental protection public transport. The results of actions are: co-financed 70 low-floor trams, 100 buses on biodiesel and 60 on natural gas, 147 displays for stations of public transport which are providing information about the time of vehicles arrival, installation of video surveillance in 140 new and 50 old trams and 74 buses.

Procurement of vehicles on biodiesel aim to reduce fossil fuel consumption by 10%, decrease CO2 emission into the atmosphere and lower the noise level. The results of actions are: co-financed purchase of 52 new vehicles on biodiesel (vehicles for disposal of waste and street cleaning) by "Čistoća"
